

We Help Students Reach Their True Potential

At the WHIZard Academy for Mathematics & English, we assist a wide variety of students, including those who want to maintain good grades, those who need a challenging enrichment program, and those who are experiencing problems with school work. By helping all students excel as learners, the WHIZard Academy ensures that they gain the skills and confidence to succeed at school, at home, and in their future careers.

To prepare students for school and life, it is essential that problem areas receive prompt attention. If students do not understand basic concepts in their early grades, those gaps quickly widen, and students may lose interest or confidence in their abilities. As a result, they may fall even further behind. At the WHIZard Academy, we fill these gaps to ensure that students understand and enjoy their studies. And we give advanced learners new challenges to nurture their potential and avoid boredom and distraction

The WHIZard Academy for Mathematics & English offers internationally proven tutorial and enrichment programs, with over 25 years of proven results assisting students with Mathematics, English/Language Arts and Science. There are currently over 55 centers operating throughout the U.S. and Canada.

Learning at the WHIZard Academy

The WHIZard Academy uses a “building block” learning approach. As one topic builds on the next, students must master each topic before continuing. This ensures students understand 100% of each concept taught. Upon entering the WHIZard Academy, students receive a free, standardized skill level evaluation to determine their strengths and problem areas. Individualized programs are then custom designed to meet the needs of each student.

At the WHIZard Academy, students work at their own pace in a quiet, supportive environment. This reduces peer pressure, distractions, and other learning barriers, and helps students find the right focus to achieve their academic goals. Students at the WHIZard Academy learn by using three senses: reading, writing and listening. At individual, private study stations, students use audio and visual material suited to their levels. Written worksheets reinforce lessons to help ensure students gain a complete understanding of their lessons before moving on.

All work is done under the supervision and care of WHIZard Academy tutors, specialists who are carefully selected, trained and certified. The tutors assist students with all questions and provide further instruction and immediate feedback to speed understanding and advancement.

Programs Available at the WHIZard Academy
